

- 1 [Create and populate an item](#)
- 2 [Operations with the nomenclature directory](#)

Creating a product catalog is a typical process of creating an item in the 1C system.

Work with the nomenclature is shown in detail in the video tutorials below.

The item group (product) on the site is displayed as a [category](#) in the product catalog.

Create and populate an item

Operations with the nomenclature directory

For products to be displayed in the catalog in the Agora system, you must select a [category](#) for them on the site.
